Ayon Helios

“High current single-ended triode power amplifier”

The Helios offers a single-ended / Class-A operation with a phenomenal 3D spacious soundstage. Precise low frequency, outstanding dynamic and a life-like midrange are also typical for this superb amplifier. The new driver stage design equipped with 6BQ5, the power pack of the signal tubes. This tube provides a very neutral and harmonic sound at medium and high frequencies without a predominant bass, with excellent dynamics.

Very musical large soundstage and finest resolution in mid-range and top end. Linear coherent sound with powerful reproduction of voices. The Helios opens a new sound performance level for SE amps in its price class.
