Ayon S-5

We are proud to introduce a sonically breath-taking model that may be the most musical and musically accurate Network-Player, the tube based S-5. The S-5 offers new dimensions of transparency and holographic. It immediately shows a large soundstage, greater transient speed top-to-bottom, purer resolution of low-level detail and expanded dynamic contrasts, with more bass slam, definition and extension. Compromise was not built into the S-5 design.
