## AYON – BLACKFIRE XS

“Timeless design, modern elegance and state-of-the-art technology”

A loudspeaker masterpiece with breathtaking musicality and „almost“ live dynamics.

With the BlackFire XS the Austrian craftsmen have created an extraordinary and distinctive loudspeaker housing with highest difficulties in production and perfectly rounded solid wood veneered surfaces. The sound impression is majestic with outstanding holographic 3-D differentiation. The bass is clearly structured and very powerful, punchy but also resilient and hassle-free. The mid-range sounds exceptionally smooth, colorful and natural. The high-range offers details you have never heard before so undistorted and free without the slightest trace of fierceness. The dynamics and the achieved sound level with least distortions are unmatched. A state-of-the art and altogether minimalistic cross-over network (no any resistor in the signal path) installed in a resonance-optimized “airflow damping” cabinet of high-dense instrument laminated wood makes the BlackFire XS a loudspeaker, which will set new benchmarks.
